

Product Name:

VW/AUDI/SEAT/SKODA CAN-BUS Service & Airbag Reset Tool

Shipping Weight: 0.48 kg.

This Service & Airbag Reset Tool allows you to reset your car's Airbag Fault Light & Service (Oil Service & Inspection Service) Indicators on VW/Audi/Seat/Skoda manufactured from 1994 to the latest one that using CAN-BUS protocol, please read the Compatible Vehicles for detail models.

1 Performs the following reset functions:

1.1 Cars manufactured from 1994 to 06/1999:

- 1.1.1 “Oil” - Oil Service, 15000 km.
- 1.1.2 “IN1” - Inspection 1, 30000 km or 365 days.
- 1.1.3 “IN2” - Inspection 2, 35000 km or 730 days.

1.2 Cars manufactured >06/1999 with display:

- 1.2.1 [Service Now] or [Service in....] - Inspection Service, 15000 km or 365 days.
- 1.2.2 [Service Now] or [Service in....] - Longlife, 35000 km or 365 days.

Car's Service Display	Programming
Oil	Oil
IN1	IN1
IN2	IN2
“Service in....”	Longlife
“Service now”	Longlife

(Note: Oil (15000 km) is automatically programmed together with IN1 and IN2.)

1.3 Airbag Fault Light (Cars manufactured from 1994 and up).

2 How to Use:

2.1 Resetting the service interval indicator/display:

2.1.1 Switch off ignition.

2.1.2 Plug device into car diagnostic system.

2.1.3 Press the “SELECT” button to select program as follow (Programming should be in accordance to car's service display! Mixed programming may caused error and is not recommended!):

2.1.4 Switch on ignition but DO NOT start engine (Programming can be done only with the ignition on!).

2.1.5 For cars manufactured >06/1999:

2.1.6 press the “ENTER” button briefly and the selected LED will extinguish for approx. 10 sec. and then illuminate again;

2.1.7 switch off ignition;

2.1.8 unplug device from car diagnostic system – Car's SI display goes out.

2.1.9 Longlife Service (Cars manufactured from 06/1999 to 2002, 10 sec. and Cars manufactured after 2002, 120 sec.):

2.1.10 When the Car's store key has been pressed, the appropriate LED will extinguish for approx. 3 seconds and the yellow LED will start to flash, you must now use the “ENTER” button to select the correct oil type as follow:

Program “L”	Longlife Service	km max.	time	Oil Service	Cars
Yellow LED flashes		15000	365 days	not longlife	All
Red LED flashes		30000	730 days	longlife	4+6 cylinder petrol
Green LED flashes (>2002)		35000	730 days	longlife	6-cylinder diesel
Red+Green LED flashes (>2002)		35000	730 days	longlife	4-cylinder diesel

Note: Only after the Car's store key has been pressed again will the selected service be programmed. The relevant LED will go out and then start flashes again on the selected service after approx. 10 seconds. If you had programmed the wrong service by mistake, just disconnect the OBD plug and start again. Always comply with the table since if you programmed the system incorrectly the car will run for up to 50000 km which may cause engine damage!

2.2 Airbag (Note: Inspection and repair works on airbags should be carried out by qualified personnel which has been trained for this purpose and taking the valid legal stipulations into account.):

2.2.1 Press the “SELECT” button until both the yellow and red LED are illuminated;

2.2.2 Switch on the ignition;

2.2.3 Press the “ENTER” button briefly, both the yellow and red LED will extinguish and then illuminate again after a few seconds, the error memory of the airbag is cleared.

(Note: If the Airbag Fault Light illuminates again after the reset, it indicates that there is a continuous defect in the airbag system which must be repaired before the error memory can be cleared.

Compatible Vehicles:

This tool is compatible to work with the following car models that manufactured from 1994 to the latest one that using CAN-BUS protocol:
